■ 마우스를 클릭할 때마다 클릭한 X, Y의 좌표를 TextField에 출력

```java
import javax.swing.*;
import java.awt.event.*;
import java.awt.*;

public class MouseEventExample extends JFrame {
        MouseEventExample() {
                setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
                setTitle("Mouse Event");
                this.setLayout(new FlowLayout());

                JTextField txtX = new JTextField(10);
                JTextField txtY = new JTextField(10);
                this.add(txtX);
                this.add(txtY);

                setSize(500        , 200);
                setVisible(true);
        }

        public static void main(String[] args) {
                new MouseEventExample();
        }
}
```
